

VWR® COMPACT INCUBATORS

INCU-Line® digital incubators IL 10 & IL 23

- Compact design
- Digital PID control with PT100 sensor and LED display
- Temperature range: Ambient +5 to 70 °C
- Excellent temperature stability
- Easy to use, safe and reliable

VWR digital incubators IL 10 & IL 23 offer an economical and space saving solution for microbiology or haematology applications. The temperature can be freely adjusted in increments of 0,1 °C up to a maximum of 70 °C. Heating elements are incorporated into the housing base and walls to ensure temperature stability and uniformity. The temperature control can be re-adjusted with a certificated reference temperature measuring instrument.

The housing and door frame are constructed entirely of epoxy-coated mild steel. The VWR IL 10 is available with a transparent plexiglass window to provide full visibility or a painted, opaque plexiglass window to protect photosensitive samples.

The VWR IL 23 is supplied with two perforated, stainless steel shelves which can be placed in three different positions. The VWR IL 10 is supplied with one perforated shelf and can, optionally, be loaded with up to two specially designed aluminium tube racks for vertical incubation of a maximum of 24 dip slide tubes.
